

## **Want A Clean Bill Of Health For Your Dental IT? Why A Busy Dental Practice Chose NOVA Over Others For Their IT Services & Support**

Stringham Dental is a General Dental practice in Fairfax, Virginia. They help their patients achieve and maintain complete oral health throughout their lifetime. Dr. Hedayati and his team always strive for clinical excellence and pride themselves on their amazing customer service.

## Why Did Dr. Hedayati Choose NOVA Computer Solutions For Their Managed IT Service Provider?

Dr. Hedayati purchased Stringham Dental from another dental provider. He assumed all of the services we were providing for a period of one year. After this time he considered other IT service companies, but, after interviewing them, he decided to stay with NOVA.

## Why Did Dr. Hedayati Keep NOVA On As His IT Service & Support Provider?...

He tells us that it's because NOVA has established itself as one of the premier IT companies for small businesses and dental practices in Northern Virginia. Many of his colleagues have been long-term clients of NOVA, and they are very satisfied with our level of expertise and customer service in handling challenging IT problems.

## What IT Challenges Was Stringham Dental Facing?

Their outdated network security was of utmost concern in today's climate where cybercrime is at an all-time high. NOVA was instrumental in helping them navigate the myriad of options available and implementing a best-in-class network security infrastructure and protocols.

## What Technologies Did NOVA Use To Shore Up Stringham Dental's Cybersecurity?

We installed and implemented a SonicWALL Network Firewall Appliance. The new firewall prevents unauthorized access to Stringham Dental's computer network. SonicWALL is a leader in next-generation firewalls for small and mid-sized businesses like Dr. Hedayati's practice.

## Is Dr. Hedayati Happy With The Service NOVA Provided?

Here is what he told us in his own words:

*"Dan with NOVA was instrumental in helping us navigate the myriad of options available and implementing best-in-class network security infrastructure and protocols.*

*In addition to the firewall, they manage our data backup solutions, network security and support, and all of our IT maintenance services.*

*We also added their NOVA Mail email and encryption service to ensure all of our digital communications remain secure.*

*NOVA has gone above and beyond our expectations. On multiple occasions, the level of expertise and personal service provided by Dan and his team have surpassed our expectations and went beyond any IT company we've used before.*

*We would highly recommend NOVA Computer Solutions to other dentists without hesitation!"*

**Do you want a clean bill of health for your Dental IT? NOVA's experts specialize in providing IT Services & Support to dental practices in Northern Virginia. Contact us to learn more and for a complimentary assessment of your IT needs.**
